438 days was the longest duration for a single human space mission.

La mission spatiale humaine la plus longue en un seul vol a été de 438 jours.

La misión espacial más larga en la que han intervenido seres humanos duró 438 días.

NASA Astronaut

The Hubble Space Telescope is almost the size of a school bus and can fit inside a Space Shuttle payload bay.

Le Télescope Spatial Hubble est presque de la taille d'un bus scolaire et peut être placé dans la soute d'une navette spatiale.

El Telescopio Espacial Hubble tiene casi el tamaño de un autobús escolar y cabe dentro de la bodega de carga de un transbordador espacial.

NASA Space Shuttle

The size of the ISS (International Space Station) is 108 by 74 meters – longer than an American football field (including end-zones).

La taille de l'ISS (Station Spatiale Internationale) est de 108 par 74 mètres. Elle est plus longue qu'un terrain de football américain.

La EEI (Estación Espacial Internacional) mide 108 x 74 metros; su longitud supera a la de un campo de fútbol americano (incluyendo los extremos).

The ISS (International Space Station) passes over 90% of the world's population.

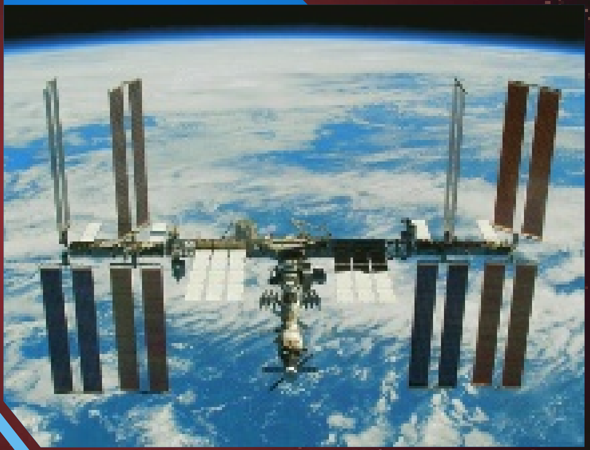

L'ISS (station spatiale internationale) survole plus de 90 % de la population mondiale.

La EEI (Estación Espacial Internacional) sobrevuela al 90% de la población mundial.

ISS • International Space Station

LEGO CITY

The Hubble Space Telescope
orbits 353 miles above the surface of the Earth.

Le Télescope Spatial Hubble orbite à environ 569 km de la surface de la Terre.

El Telescopio Espacial Hubble orbita a 569 kilómetros sobre la superficie de la tierra.

NASA Hubble Space Telescope

If you could see as well as the Wide Field and Planetary Camera on the Hubble Space Telescope, you would be able to read the fine print on a newspaper one mile away.

Si vous pouviez voir aussi bien que le champ large et la caméra planétaire du Télescope Spatial Hubble, vous seriez capable de lire les petits caractères d'un journal à une distance de 1,6 km.

Si tu agudeza visual fuese equivalente a la de la cámara planetaria y de gran angular con la que cuenta el Telescopio Espacial Hubble, serías capaz de leer la letra pequeña de un periódico a un kilómetro y medio de distancia.

LEGO CITY

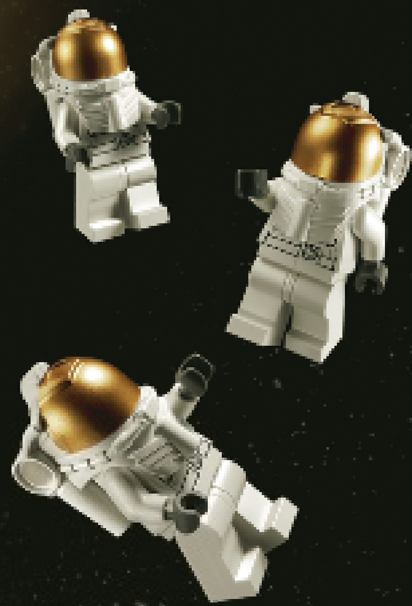

In collaboration with NASA, En collaboration avec la NASA, En colaboración con la NASA.

If someone next to you shouted in the vacuum of space you wouldn't be able to hear them.

Si une personne située à côté de vous dans le vide spatial criait, vous ne pourriez pas l'entendre.

Si alguien gritara junto a ti en el vacío del espacio, no podrías oírle.
